

Greetings from your 4-H House Renovation Team,

Now that the construction permit is in place and the *initial* inspections for the framing, electrical, plumbing, and HVAC have been completed, our contractors have been hard at work, including a few Saturdays. As you will see below, there has been noticeable progress each week. Most recently, the drywall is being installed in the restrooms and air conditioning units are being hung throughout the house as well as the ceiling tiles and LED lighting.

Restroom Framing

Air Conditioning Unit

Ceiling and LED Lighting

Progression of the 1st Floor Restroom:

End of Day 1

End of Week 1

End of Week 3

End of Month 1

Up Next: The ceramic tile work is scheduled to begin in the restrooms on Monday. This is one of the more time-consuming portion of the project, so we will keep you updated on their progress.

2015 Summer Renovation Plan:

- **Replace boiler**
- **Upgrade electric service**
- **Remodel three floor restrooms**
- **Install air conditioning**
- **Replace ceilings and lighting**

Stay tuned for renovation updates throughout the summer.

If you have any questions regarding the renovations, please feel free to contact Erin Phillips directly at elphillips33@hotmail.com.
